

Ambulatory Surgical Centers' Date of Last Survey

The table below lists ambulatory surgery centers that the Department of Health and Senior Services (DHSS) licenses independently from hospitals. The date represents the most recent inspection for compliance with State, Federal, and/or accreditation agency ambulatory surgery standards, as of January 2009. Optional accreditation through a private organization indicates compliance with the standards of the private accrediting organization. Accreditation must be renewed periodically, within every three years in the best cases. Accreditation status represents information from each accreditation agency's website. DHSS is not responsible for errors or omissions; website addresses are provided below.

In addition to the facilities listed, hospitals also offer ambulatory surgery services and pursue optional, private accreditation. The list excludes ambulatory surgery centers on a hospital license, which are surveyed with the hospital. The Center for Medicare and Medicaid Services (CMS) certifies many licensed ambulatory surgery centers and private medical practices for participation in the Medicare program as ambulatory surgery centers.

Contact information for licensed facilities in this list may be obtained by searching for facility type, "Ambulatory Surgery" at <http://nj.gov/health/healthfacilities/search.shtml>. Survey results for licensed facilities in this list may be obtained through an Open Public Record Act (OPRA) Request at <http://nj.gov/health/opra/index.html>.

Further information regarding accreditation may be available from the website for the relevant accreditation agency: Accreditation Association for Ambulatory Health Care, AAAHC, at <http://www.aaahc.org>; Joint Commission for Accreditation of Health Care Organizations, JCAHO, at <http://www.jointcommission.org>; or American Association for Accreditation of Ambulatory Surgery Facilities, AAAASF, at <http://www.aaaasf.org>.
